Networking Djursland conference

Klavs @ 1:34 am

March 22, 2007

The partners in the Networking Djursland project had a chance to meet at the conference today at the Labour market educational center in Djursland. The conference was called to by DIIRWB and also Djurslands Development Council, Djursland Business Council and the labour Market educational Center. The participants in the conference was wellknown and allready established partners as well as invited businesses, politicians and municipallity officials. As the conference was publically announced also some private citizens had found their way to the middle af Djursland.

The conference was placed on the exact day and place where a similary conference 6 years ago (at march 21. 2001) was held with the title "Broadband to Djursland now!".

This conference 6 years ago had a major role in the process which led to the establishment of Djursland.net and its 9 local nets. Until now the local nets have established broadband access to more than 5000 households to 1/3 af the marketprice which is payed in the big cities. The conference had focus on building on top of the established infrastructure - to build also human networks and to benefit from the synergies possible from networking the different projects in Networking Djursland, - all to further develop Djursland in respect of informational techonology and -communication.

WSFII is an ongoing international process of multiple, local action oriented events which provide space for people to come together, to share experiences, present practical solutions, to learn and to build, all kinds of Free Information Infrastructures.

DIIRWB - part of
WSFII

The establishment of DIIRWB is in fact one of the projects contained in the Networking Djurslands framework. The initial 16 pilotprojects has expanded to a few more: The digitalisation of material in public local archives and also the establishment of a “virtual Djursland” in partnership with amongst other the turist business.
